Decorative glass has been used through the ages to imbue windows and doors with beauty, style and elegance. This ancient yet timeless craft has enjoyed a revival over the last 20 years as modern home owners have discovered its ability to add character, charm and originality to their PVC doors and windows.

As you browse through our catalogue, you will discover page after page of beautiful design options to suit a broad range of homes and tastes. Whether you live in a modern town house, a traditional suburban home or a country cottage, you'll find a host of stunning styles designed to enhance your home with its own unique personality.

Harnessing leading-edge technology with traditional craftwork

As leaders in the decorative glass market, Glass Systems Ltd has been at the forefront of innovative design and superior craftsmanship for the last 25 years. All the designs in this catalogue are manufactured using a decorative glass technique known as 'Overlay', a method whereby all the materials are applied to the outer leaf of the insulated glass unit.

This creates a truly modern version of leaded glass, which features greater strength and thermal insulation qualities than traditional stained glass. The end result - high performance decorative glass that retains the vibrancy, depth and timeless beauty of traditional stained glass.

The Overlay materials are rigorously tested to prove their suitability for use in modern windows and doors in all climatic conditions from the cold of the Russian winter to the heat of the Australian summer. These materials have proven themselves over 25 years of use in the decorative glass market worldwide to produce outstanding performance and durability. And with a 10 year warranty, you can be confident of enjoying your decorative glass for the lifetime of your windows.

Design Options

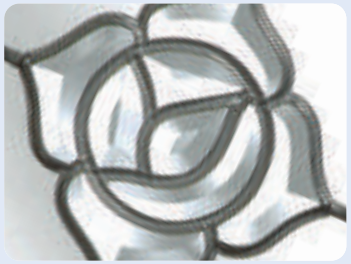

Explore our extensive portfolio of designs, ranging from traditional motifs with timeless appeal, to contemporary styles which make a remarkably modern design statement. Let yourself go, get creative and discover the design style that reflects your personality with flair and imagination. Our stunning ranges of decorative glass fall into three distinct categories:

Colour Designs

Using a beautiful combination of lead profiles and coloured glass effect films, we can create designs that will infuse your home with a palette of delicate colour. Create a charming focus in your conservatory or add your own distinctive character to your doors and windows.

Bevelled Glass

Our elegant range incorporates 5mm glass multi-faceted pieces, clusters and shapes which refract and reflect light to create a constant interplay of movement. Choose from clear or coloured bevelled glass designs to create windows and doors of distinction.

Fusion Elements

Traditional stained glass meets modern design in this modern twist. These glass elements are handmade by fusing molten coloured glass together, creating an eye-catching feature. With an extensive spectrum of sumptuous colours to choose from, we can create designs to suit your style.

Bespoke Designs

If it's possible, we'll do it. Each design in this catalogue can be customised with a range of coloured lead profiles, a wide selection of coloured effect films and fused glass tiles. Due to the supremely flexible manufacturing systems we employ, it is also possible to alter the sizes of most designs to create a perfect match with your windows and doors. Our designers use specialised software to ensure that each design is perfectly proportioned before the manufacturing process of your bespoke design takes place.

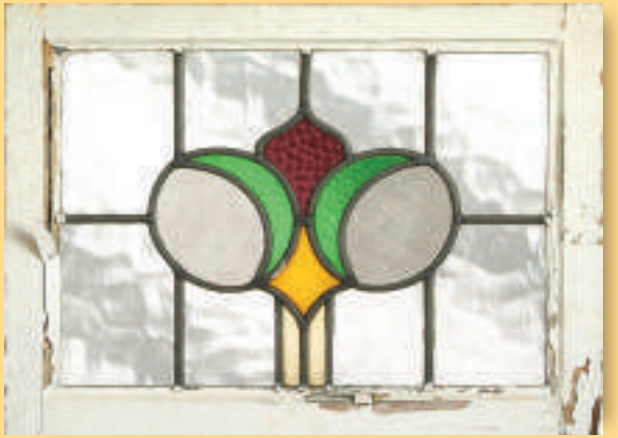

New for Old

Yesterday's Design with Today's Performance

Over the years, many customers have asked us to replace original lead lights with modern 'overlay' designs. Working with sensitivity and incredible skill, our craftsmen have the ability to restore your original window to its former glory. With an extensive range of colours, textures and glass shapes at our disposal, we can create identical overlays to blend harmoniously with your existing stained glass windows or to create accurate replacements.

Door Options

Just like your home, your front door speaks volumes about you. Our inspirational design team has created a range of effortlessly elegant options to transform everyday doors into beautiful doors of distinction.

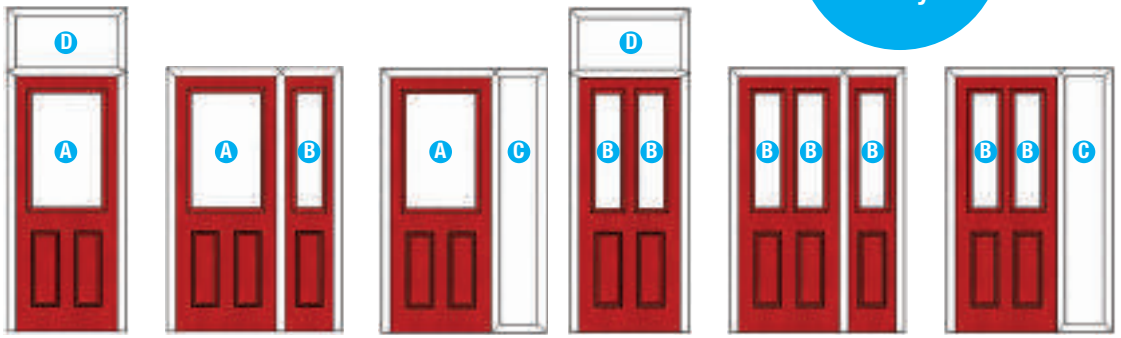

Whether you live in a traditional or contemporary home, you'll discover an extensive range of breathtaking designs created to mirror your personal taste and the unique character of your home. Although the many styles illustrated in this brochure feature the increasingly popular and durable GRP composite doors, our designs can easily be adapted to suit PVCu and traditional timber doors.

When you want to make a great first impression, a beautifully crafted entrance door has the power to elevate a humble door into a distinctive architectural feature that may include attractive sidelights or an eye catching, stylishly glazed toplight.

When you choose a Decorative Elements design, you can be confident that you never have to sacrifice the warmth, security and excellent sound insulating properties that have made our beautiful glazed features not only aesthetically pleasing but also eminently practical.

Perfect for Composite, PVCu or Timber door styles

Film Colour Options

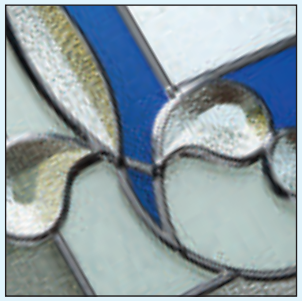

We have carefully selected colours from the extensive range available to us which we believe work best with the individual designs. However, if customers prefer to alter colours, we have a library of over 400 colours and effects to chose from. A catalogue of this collection, supplied by RegaLead, is available to download at www.decorativeoptions.co.uk or as swatches.

Lead Options

Natural

Antique

Brass

We offer a range of lead profiles in various colours. In this catalogue, all the designs have been created using our popular Antique colour which as well as having a ready aged look, also benefits from a polymer coating to protect the lead surface from weathering. For customers who require a more traditional look or wish to have the joints soldered, we can manufacture using our Natural profile. With the Natural lead, the colour will change from a bright silver to a matt grey look over time as the product naturally weathers.

Fusion Tile Options

We have a vast range of fusion tile options to chose from and all the designs shown are available in Blue, Green, Red/Orange, or Black colourways to compliment your door or furnishings. In certain designs, it is also possible to have a brown/cream colourway. The full range of colour options are shown at www.decorativeoptions.co.uk.

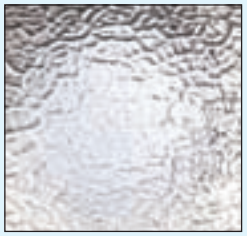

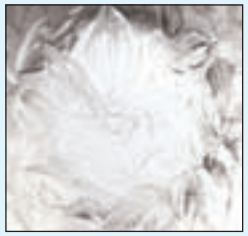

For details of the full range of fusion glass tiles and to download a catalogue:

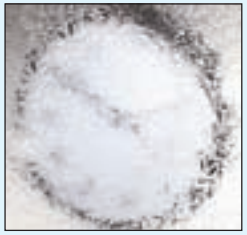

www.decorativeoptions.co.uk

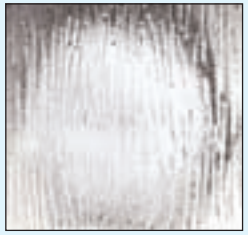

Backing Glass Options

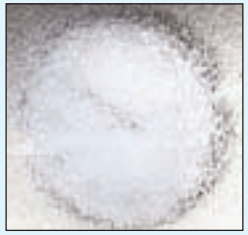

Any of the designs featured throughout this brochure can be backed with textured glass. Simply choose the textured design and level of obscurity best suited to you requirements.

Technical Information

Size Limitations

The designs shown in this catalogue are as follows:

Fanlights:	**500 x 250mm**
	520 x 350mm
Half Glazed Doors:	**558 x 912mm**
Dual Glazed Doors:	**202 x 912mm**
French Doors:	**511 x 1763mm**

It is possible with all designs to alter sizes but certain elements such as glass bevels, Fusion tiles and glass Jewels are standard sizes so the designs may have to be altered to accommodate.

Material Specifications

Lead profiles

The lead profiles used are manufactured using 99.5% pure lead which is applied to the glass surface with a pressure sensitive acrylic adhesive.

Like any unprotected product exposed to the environment our Natural lead will undergo a level of atmospheric transformation and change colour. This is a normal and expected process and will eventually settle down to take on the 'weathered lead' appearance of traditional lead-lights.

For customers looking for a consistent colour we recommend the use of Antique lead which has a dark gray coating on the surface to protect the lead from weathering. However, with the use of Antique lead it is not possible to solder joints.

For customers using our Brass coloured profiles, these are only recommended for use when encapsulated within a triple glazed unit.

Stained Glass Art Film

All our Stained Glass Art Films are manufactured by hand and no two sheets are ever identical so variations in the pattern and colour density are a feature of the product. On designs where effect colours are used it is never possible to make an exact reproduction of the design shown in the catalogue. The maximum sheet size for the Stained Glass Art Film is 460mm x 660mm so on certain designs it may not be possible to enlarge without making changes to the design.

Glass Bevels

Our Glass bevels are manufactured from 5mm glass with a typical 12mm bevelled edge. These products are handmade and therefore slight variances in size and bevel width are possible.

Our bevels are bonded to the surface of the glass with a specialist UV Curing adhesive which should remain glass clear for our 10 year guarantee period. Small bubbles in the adhesive layer are common when applying the bevels and are not deemed as a fault.

Fusion Tiles

Our Fusion glass tiles are manufactured by hand and involve melting two or more layers of glass together, it is therefore common to get small air inclusions in the glass. These are a feature of the product and add dimension and contrast to the tile and should not be seen as a fault.

Cleaning and Maintenance

All our decorative glass options should be cleaned regularly using water based proprietary glass cleaners. Always avoid the use of any cleaners that may contain solvents or have an abrasive effect on the surface cleaned

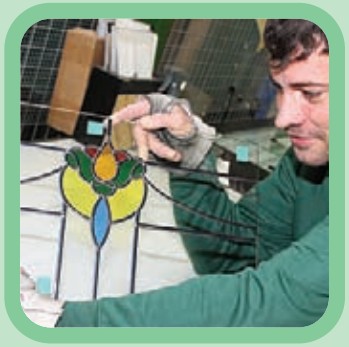

On newly installed decorative glass it is possible that small white deposits can 'leak' from the edge of the lead. It is important that these are cleaned off the glass and not allowed to run onto the window frames.

Photographic and Printing Limitations

Due to the nature of the printing process, colours in real light conditions may vary slightly from the photographic reproductions in this brochure. Stained Glass Art Film colour samples are available to verify colours.
